Caltech Basketballers to Meet Oxy Five in Friday Tilt

Strong Victory, Two Close Defeats Behind Tech at First Conference Game

Friday night Coach Carl Shy will send his as yet untested hardwood aggregation against a strong and highly rated Oxy five. The Beaver varsity dropped two close decisions before Christmas to Pasadena Nazarene and Chapman, but during the past three weeks they have been steadily improving, and in their last practice game a week ago slaughtered the Pasadena "Y," 66 to 26.

The Oxy Tigers made a good showing at the Redlands tourney, dropping a one-point decision to the Whittier Poets, ultimate tourney champs and generally regarded as the team to beat in the Southern California Conference race. Since the tournament the Tigers have continued to build up a strong record, and with the home floor advantage Friday night in addition to this must be rated the favorites over the Tech hoopers. But don't sell your team short. Coach Shy might very easily put a team on the floor which averages 6-feet 4-inches, and on Oxy's tiny court height becomes an important factor.

Underdog?

Actually, it is unfair to place the Varsity in the role of the underdog because of their two early-season losses. They entered the tournament at Redlands with insufficient preparation due to the early date of the tourney and also to the difficulties in obtaining a gym in which to practice. Then the team's leading point maker, Paul Saltman, was excused from the fracas after 13 minutes of the first half.

(Continued on Page 3)

First CES Assembly To Have Patent Talk

The AIEE and the IRE will jointly sponsor this term's first meeting of the Consolidated Engineering Society next Monday at the regular assembly time. The speaker will be Prof. Mackeown of the Electrical Engineering Department.

Dr. Mackeown will draw upon his wide experience in the patent field to give a talk which will be of interest to students of all options and of value to those who may some day have occasion to protect an original idea.

SAE Plans Trips

The SAE is planning several field trips during the coming term, including visits to the Northrup plant in Hawthorne, and the General Motors assembly plant in Van Nuys.

Non-members will be invited when the type of trip permits more than the number of members attending.

Due to some doubt as to whether all the SAE enrolled students are listed with the officers of the branch, Joe Wechsler asks that any student member of this society who did not receive a circular letter this week get in touch with him in Room 19, Ricketts.

Campus Calendar

THURSDAY, JANUARY 8—
Upper Class Luncheon Club at the Training Table, 12:00.
Throop Club Meeting, 12:20.
Glee Club Rehearsal in Throop Club.

FRIDAY, JANUARY 9—
Basketball game, Caltech vs. Oxy, there.

SATURDAY, JANUARY 10—
Basketball game, Caltech vs. Pepperdine, there.

SUNDAY, JANUARY 11—
Musicals in Dabney Lounge

TUESDAY, JANUARY 12—
Newman Club in Dabney, 4:15 p.m. All Catholic students invited.

Band Rehearsal in Culbertson Hall, 7:30 p.m.

WEDNESDAY, JANUARY 13—
Frosh Luncheon Club at the Training Table, 12:00.

Orchestra Practice in Culbertson Hall, 7:30 p.m.

THURSDAY, JANUARY 15—
Upper Class Luncheon Club at the Training Table, 12:00.

Throop Club Meeting, 12:20.

Glee Club Rehearsal in Throop Club, 8:30 p.m.

FRIDAY, JANUARY 16—
Student Assembly, 11 a.m.

Basketball game, Caltech vs. Redlands, here.

SATURDAY, JANUARY 17—
Basketball game, Caltech vs. Chapman, here.

California Institute of Technology

Illegal Parking Brings Warning

The Public Relations Department of the Institute has recently made the following announcement to those persons on campus who drive cars.

"We have recently had a number of people complain to us about cars being parked so that they protrude out across private driveways, thus blocking them so that persons occupying the property could not get their cars onto the street. We also know that the Pasadena Police Department has been asked by some of these people to check such violations and that it has been doing so. The result has been a number of citations for illegal parking."

"The attention of all Institute personnel is also called to the fact that some time ago additional parking space was provided in Tournament Park and that there is always some space available there. This involves walking a little farther, perhaps, but it also saves paying a \$2 parking fine."

The Eastman professorship is awarded periodically to outstanding American scholars and scientists. Dr. Pauling was appointed this professorship last summer.

Pauling To Journey For Oxford Lectures

Dr. Linus Pauling, chairman of the division of chemistry at Caltech, left Pasadena December 19 en route to Oxford University, England, where he will lecture in the field of chemistry as the Eastman Professor from this country from January to June. His family accompanied him and they sailed aboard the S.S. Queen Mary from New York on December 26.

The Eastman professorship is awarded periodically to outstanding American scholars and scientists. Dr. Pauling was appointed this professorship last summer.

Religion, Politics, Sociology Discussed at "Y" Conference

From all reports this year's Asilomar, as the year before, was another fine conference. Over 400 delegates from the YMCA's, YWCA's, and SCA's of the universities and junior colleges of California, Nevada, and Hawaii met for the six day affair. An even dozen were there from Caltech collecting data and information which should help to make the "Y" increasingly popular here on our campus.

The theme of the conference was "Community" and considerable thought was given to both the means by which a genuine community may be realized in the world and to the problems which threaten the accomplishment of this goal.

Buell Gallagher, from the Pacific School of Religion, gave a series of addresses relating to an understanding of the Christian Faith. Martin Hall, born in Germany and with the underground during the last war, created quite a sensation with his talks on the Russo-American problem. Harry Kingman, from Stiles Hall at U.C., led several discussions on civil liberties, and attention was given here to the recent developments in the Hollywood investigation and other similar actions which are going on throughout the country. The Marshall Plan, U.M.T., and the Third Party also came in for their share of discussion.

Social Events Enjoyed

All was not work and thought, however. The social side of the "Y" was not overlooked and a fine program of recreation was provided. Caltech avenged an earlier defeat by trouncing Oxy in a six-man football game. The score was 1-0. Oxy did not field a team. John Lewis showed what Caltech men are made of by going swimming in the ocean on New Year's Day.

Twelve Attend From Tech

Those attending from Caltech were Dick Alexander, Bob Crichton, George Davenport, Vern Edwards, Olly Gardner, Jim and Bertha Harder, Wes Hershey, Kon Hock Khaw, Pete Knoepfler, John Lewis and Ed Loomis.

Field Trip Enjoyed by Blacker Men and Dates

The Acme Brewing Company entertained a large group of Blacker men and their dates last night at the Acme Sequoia Lodge.

Dinner was served at seven, and this was followed by a moving picture about the manufacture of beer. During this time, Acme was offering a liberal sample of their fine product.

The evening's proceedings were very enjoyable and a fine time was had by all.

Tech Debaters Place In Nationals

Sulmeyer Annexes Third in Oratory At Salt Lake City Tournament

Tech Bio Labs Develop New Growth Inhibitor

From the leaves of a low, dome-shaped desert plant which Americans call the Brittle Bush, the Mexicans and Indians call Incienso and known to scientists as Encelia farinosa, a new plant growth inhibitor, and a weed killer, has been developed at the California Institute of Technology.

Not only did Caltech Biologists James Bonner and Reed Gray determine what the leaves of the Encelia plant carried that inhibited growth around it, but they also have been able to reproduce the plant inhibitor synthetically. It is 3-Acetyl-6-Methoxybezoaldehyde, a new chemical compound. They call it AMB for short.

Dr. Bonner's observations of Encelia farinosa plants growing in their natural habitat on California and Arizona desert lands led him into the investigation. He noted that while many desert plants apparently attract and favor growth of plants around them, Encelia farinosa had little, if any, such plant life about it. It was his curiosity about why this occurred that led to the development of the new plant inhibitor.

He was not, however, the first to turn the plant to human use. Indians chewed its resin and also smeared it warm on their body to relieve pain. Early Padres burned the crystals of resin which exude from the somewhat woody stem as incense. When melted it was used as a varnish. But it was in the leaves, not the stem or roots, that the Caltech scientists found the plant growth inhibitor, isolated it, and then produced it synthetically. It is a compound that has never before been reported and was previously unknown to chemists.

Research on AMB as a spray to kill remains to be done and all information to date has been obtained through introducing the inhibitor through the root system. It was found that if a plant took up as little as one milligram of AMB growth was markedly inhibited. If it took up as much as two milligrams it died.

What are the practical applications of the new chemical compound? The Caltech scientists feel that work has not progressed far enough to justify making predictions but do point out that compounds like AMB, which have selective killing action, hold considerable promise as weed killers.

They are more interested in the fact that their experiments tell them something of the sociology of plants in their native habitat, pointing out that Encelia, by its toxic action, helps determine what plants grow in association with it. "This property of Encelia is a chemical

EPHEMERAE

Old Etain Shrdlu, who sometimes contributes to the Tech, has already commented upon the sad breakdown of many of the old Tech traditions. We must hesitantly report that one of the most sacred of these has just been smashed completely.

It has been ritual for some time for the ASCIT president, upon congratulating the new editor of the Tech each year, to observe that he does not expect to see same around too much longer, or to put it more bluntly, that it is tradition for the editor to flunk out and most of the department editors to be hanging on the ropes by term end.

Still Here

As you can see from the masthead above, we're all still here this term—but—and at least in the years I've been helping with this sheet it has never happened before—believe it or not, the editorial board of the Tech has come up with a collective GPA of better than 3.2... and even a couple of ex-editors, Bob Heppe and Bill Karzas, as you may have noted, turned up on Tau Beta. And their excuse for leaving was "grades." Come back, fellows, you can do it here too!

Seriously, though, I'd like to get over the point to those of you who would like to work on the Tech and are still wavering on the brink, that perhaps having the additional load that we will promise you if you join us will prove a help rather than a

Long View

The Longs threw a little New Year's affair at their casa out towards Pacific Palisades. Only about half the expected multitude showed up, most of them because of Virus X, but Carl Price, who is on such intimate terms with Vector that he writes a column which we won't mention about how to get dates, didn't come because he couldn't get a date. Great!

Among those present were Dennis, Neville, and their sister, and some Fleming elite such as Schuster, Woods and Eschner. Lone Tech was Dabneye Herzog who came bearing gifts and was let in for fear he'd take them elsewhere.

Some industrious persons were heard playing ping-pong at 3 a.m. . . . but then Fleming men . . . at an obscure pre-dawn hour some of the guests ventured out of the downstairs darkness and discovered that all the hosts had retired. This subtle hint brought about the closing of festivities.

Throop Cooks

Throop's New Year's Eve party got under way in spite of having their amplifier and record player swiped. It seemed like a heckva way to finish off the old year, but Dabney came thru with the loan of their equipment, which in conjunction with an adapter rounded up by Prexy Benton elsewhere served magnificently. When the party was

scheduled to commence Bob was down to his shirt sleeves and swearing horribly over the difficulties encountered in trying to fit two male plugs together using a screw driver as a soldering iron. Bill Smyth, Dabney faithful, when informed of the situation, volunteered his iron and the contact was finally consummated.

Thereupon the music began to play, the dancers began to dance, and the lovers began too. The party officially started only a half-hour late. The word "officially" is used advisedly, since at least one couple was dancing at least twenty minutes before the music began. Reference is made to Dick Miles and Kitty Dowe, Oxy guest.

Remarks of the evening came from Old Man Benton. When asked if the best thing his wife did was talk, he shot back with a "Hell, no!" and declined to elucidate.

Engine Trouble

Chan and Louise conducted themselves in a revoltingly orderly manner. Chan's motor was racing, however, and unable to restrain his "id" any longer, he convinced her to accompany him to other parts.

Cause for American Pride . . .

THE GETTYSBURG ADDRESS

* Just ten stirring sentences in all. But they are an immortal expression of democracy and freedom. Shown here, in Abraham Lincoln's own handwriting, is part of the manuscript from which he spoke on the afternoon of Nov. 19, 1863. The original, along with more than a hundred documents famous in American history, is on exhibit aboard the "Freedom Train". This train is now on a nationwide tour. Watch for its arrival in your area!

Four score and seven years ago our fathers
brought forth, upon this continent, a new nation, con-
ceived in liberty, and dedicated to the proposition
that all men are created equal.
Now we are engaged in a great civil war, test-
ing whether that nation, or any nation, so conceived,
and so dedicated, can long endure. We are met
here on a great battle-field of that war. We have
come to dedicate a portion of it as final resting
place of those who here gave their lives that
that nation might live. It is altogether fitting
and proper that we should do this.
But in a larger sense we can not dedicate—
we can not consecrate—we can not hallow this
ground. The brave men, living and dead, who struggled
here, have consecrated it far above our power

Be proud of what you write . . .

and the way you write it!

Pride comes with the possession of a Parker "51".

For this is the world's most-wanted pen . . . flaw-

less in its beauty and performance. It writes
in a way that does you proud. No urging.

No coaxing. The "51" starts instantly.

Coasts across the page with clean, easy strokes.

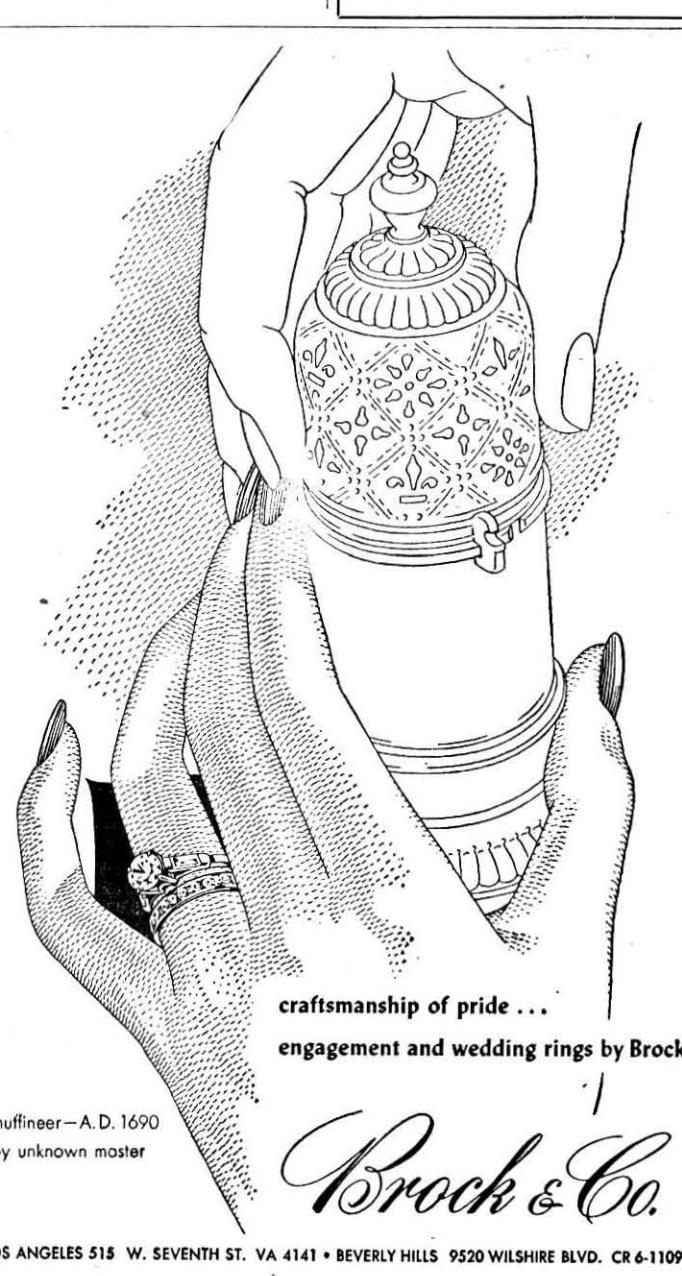

Two sizes: regular "51" and new demi-size.

Both with choice of custom points. The Parker

Talkin' It Over

with The Goon

Happy New Year, men! Hope that most of you have recovered from those wild two weeks of broken training. Doc Hanes is currently doling out sulphur and molasses, for the boys aren't quite back in condition, so in case you still have those 3.2 Blues, drop over to the field house.

Saw my first football game on television New Year's Day. Television is here to stay, but I'm not sure about the Trojans. Even the Michigan band outplayed the lads in the Red and Gold—glee club and all. Andy was thinking of going T next year with "Perry" Goethard in the quarter, but after watching the Wolverines pulverize Troy, "Fritz" Anderson made this statement: "That single wing looks pretty good to me." Looks like the line is going to be working hard next season holding out the opposition while all four of the

backfield boys handle the ball.

Third Degree

Digging around the casaba patch this vacation were most of the Varsity. The bucketeers spent a few quiet evenings getting the third degree from the L.A. Police Force squad. I don't want to say that the cops were very big or very good, but they had a team on the floor that must have averaged 210 pounds and stood 6-feet 2-inches tall. Not only that, but they had one All-American, two men who were on the 20th Century-Fox team that consistently won the AAU title, plus a few others who lettered for the Trojans and other small schools in the vicinity.

Montgomery got the roughest going over; the cops must have thought he robbed a bank. They sent him to the receiving hospital to get stitched up a bit.

(Continued on Page 4)

Frosh Sport Roundup

By Earl Hefner

Some higher power than your columnist has decreed that there shall be a paper this week, and so, despite the lack of activity in Frosh sports, we will attempt a column.

The Frosh basketball team plays their first conference game of the season tomorrow night at Oxy. Via the grapevine, it is rumored that the Tigers have a rather nice Frosh team and that our boys are in for a tough battle. After a two week layoff, the Frosh are in need of considerable practice as was shown in a scrimmage against the Presbyterian Church five, last Monday night. Although the Beavabees won rather easily, they were rather sloppy in their play.

Andy Shines

An amusing sidelight of the scrimmage was the first and only appearance of the season of Coach Andy "there's your man, Reed" Anderson, who subbed for Frosh Coach Ed Preisler. Andy proved to be not only an efficient basketball mentor, but due to his many years of football coaching experience he was able to use his vocal chords to great advantage in instructing the players from the bench.

As a contrast to this scrimmage, the Frosh looked pretty sharp in their first real game of the season, against Chapman College. The yearlings built up a 14 point lead at halftime and

Frosh Casabamen Set For Meets with Oxy, Pepperdine

The Southern California Freshman Conference will open tomorrow night when the Beaver Frosh meet the Occidental Cubs at the Oxy gym. The Tigers are considered one of the best teams in the league, but the untested Frosh may provide their hosts with a battle if their first string can hit the basket.

After a two week Christmas recess the Frosh have resumed practice for the tough 12 game schedule that lies ahead. Following the Oxy game, the young Beavers play hosts to the rugged Pepperdine crew at the Armory, Saturday night. Probable starting lineup for the Frosh is Al Sereno and Bud Freise at forwards, Thorne Butler, center, and Dick Brewer and Ray Greuter at guards.

In their only game of the season thus far, the Freshman licked the Chapman College Frosh, 46-30, Dec. 12. Dick Brewer starred for the Tech five, getting 11 points while forward Al Sereno hit for 10 counters. After the opening minutes of the contest the Beavers took the lead and controlled the remainder of the game, as Coach Preisler made frequent use of the entire squad.

went on to win, 46-30.
The team now consists of 20
(Continued on Page Four)

BOWEN AIMS FOR BASKET

Ted Bowen, Tech forward, is shown here, center, in an exciting moment in last year's meet with Occidental College, held there. Bowen is preparing to shoot while opposing players look on in dismay, and Oxy spectators (background) gasp in horror. Bowen is again on the Caltech team which will meet Occidental on their home court tomorrow night, in an attempt to bring the haughty Tiger team to its knees.

CALTECH BASKETBALLERS

(Continued from Page 1)

because he had used up his five allotted blows at this early stage. The Chapman tussle was a nip-and-tuck affair from the opening whistle. The Beavers grabbed a 2-point edge midway in the second half, but Chapman's superiority at the free-throw line earned them a 3-point margin. Guard Bill Cox turned in a fine

job of rebounding and defensive play in this game.

In the one-sided victory over the Pasadena "Y," Ted Bowen was deadly on tip-ins and racked up 22 points while Saltman contributed 18.

Following the league opener with Occidental, the Beavers will travel to Pepperdine Saturday night for their fourth game of the season, a non-league tilt.

DUPONT Digest
For Students of Science and Engineering

Rubber accelerators lead the way to new agricultural fungicides

Vulcanization accelerators for rubber and agricultural fungicides would seem to have little in common. But the wide variety of interests of men in the Du Pont organization sometimes result in outstanding developments from such apparently unrelated products.

A rubber chemist suggested to a plant pathologist that derivatives of dithiocarbamic acid, $\text{NH}_2\text{C}(\text{S})\text{SH}$, parent substance of a well-known group of rubber accelerators, be tested as insecticides. His suggestion was based on the possibility that sulfur combined in this form might be more effective than free sulfur, a recognized insecticide.

Entomologists and plant pathologists investigated the fungicidal as well as the insecticidal properties of this group. One of the first compounds tested, sodium dimethylthiocarbamate, $(\text{CH}_3)_2\text{N-C}(\text{S})\text{SNa}$, even in dilutions of 1:30,000, was found to be a powerful fungicide, but somewhat injurious to plant life.

This led to a systematic program of research including other metallic salts, the ethyl, propyl, butyl, phenyl, and other aryl derivatives of the dithiocarbamates and thiram mono- and disulfides, and the related compounds

made from ethylenediamine and morpholine. In this phase of the work, organic chemists played an important role by suggesting various derivatives and preparing them for tests. Later, in cases where proper dispersion and adherence of the compounds to plants were important, the skill of physical chemists was called upon.

In general, the compounds of greater chemical stability were found to be less effective. Fungicidal efficiency diminished with increase in size of alkyl radical, and as aryl radicals were substituted for alkyl. Thus the unusual situation developed that with the exception of the bisethylene (dithiocarbamates), the first and simplest products tested, the methyl derivatives, proved to be the best fungicides.

Iron and zinc dimethylthiocarbamates, $(\text{CH}_3)_2\text{N-C}(\text{S})-\text{S}-\text{M}-\text{S}-(\text{S})\text{CN}(\text{CH}_3)_2$, are now sold as "Fermate" fungicide and "Zerlate" fungicide respectively, for control of fungal diseases of many fruit and vegetable crops, tobacco, flowers and other ornamentals. Zinc ethylenebis(dithiocarbamate), $\text{Zn}(-\text{SC}(\text{S})\text{NHCH}_2\text{CH}_2\text{NH}(\text{S})\text{CS}-)$, marketed as "Parzate" fungicide, has specific action in the control of late

B. L. Richards, Jr. Ph.D., Cornell '44, and A. H. Goddin, M.S., University of West Virginia '32, test efficiency of "Parzate" fungicide in control of tomato late blight and bean rust. Equipment is specially designed laboratory spray chamber.

blight on potatoes and tomatoes. Tetramethylthiuram disulfide, $(\text{CH}_3)_2\text{NC}(\text{S})\text{N}(\text{CH}_3)_2$, is used in two compositions, as "Arasan" disinfectant for seeds and "Tersan" fungicide for turf diseases.

Overall, the derivatives of these groups of compounds proved to be outstanding as fungicides, rather than as insecticides. Although a marked degree of specificity for different pests was characteristic of the members of this series, it is interesting to note that all three were highly effective. This work offers still another example of how the breadth of interest in a company like Du Pont can lead to worthwhile developments.

Questions College Men ask about working with Du Pont

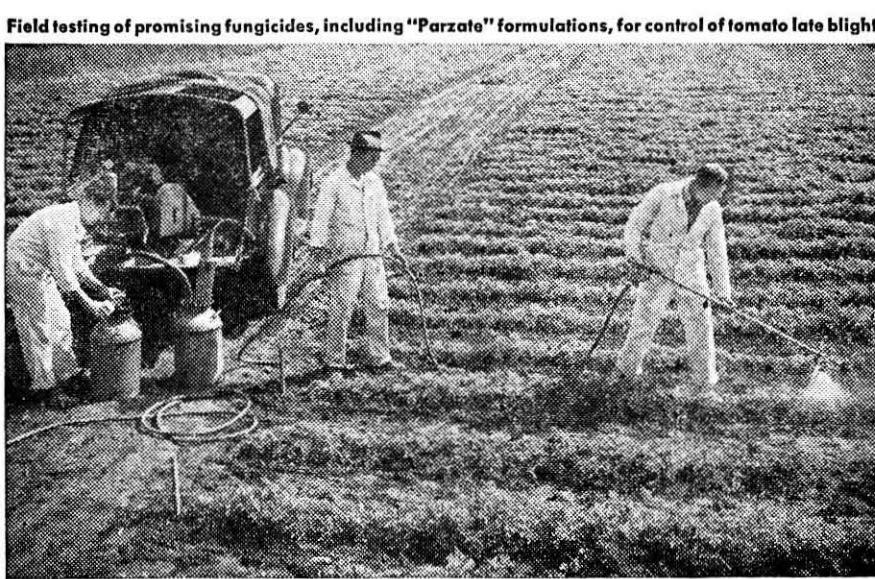

What are the opportunities for research men?

Men qualified for fundamental or applied research are offered unusual opportunities in facilities and funds. Investigations in the fields of organic, inorganic and physical chemistry, biology, parasitology, plant pathology and engineering suggest the wide range of activities. Write for booklet, "The DuPont Company and the College Graduate," 2521-A Nemours Building, Wilmington 98, Delaware.

Opportunities Open On Staff of "Tech"

There are several openings on the staff of the "California Tech" for anyone, yes anyone, who can write, type, gather news or is not violently opposed to learning some of these precious skills reserved to members of the Fourth Estate.

All persons interested in serving themselves and their school should run, not walk, to the "Tech" office Monday evenings in lower Fleming, or contact some staff member.

FROSH ROUNDUP

(Continued from Page Three)

palyers the latest addition being 6' 4" Dick Libbey. Libbey joined the team at the conclusion of the water polo season where he made a fine showing on the first string. He will probably alternate with Thorne Butler at center.

Home-Sweet Home

We were approached the other day and asked this question: "Since Caltech has no gym, just where do the Frosh work out?" We were at a loss of words for a moment to explain that the Preisler boys have now practiced in six different gyms. At the present time they are practicing at the First Baptist Church, but will return to their original "home" next week for (they hope) the remainder of the season. Ah me, there's no place like home!

CAMPUS BREWINS

(Continued from Page 2)
Unhappiest man of the evening was Jack Flynn who, in a burst of holiday spirit, flung a chunk of serpentine into the crowd and accidentally his watch along with it. His next move was to make a boor out of himself by turning on the lights, climbing on the thing we are not allowed to mention in this column in connection with our fair campus (there is one at the Skip Inn, however) and asking the mob to spare a few seconds to look on the floor for his watch. Feeling miffed at being excluded from the gaiety, Phil's girl friend took matters into her own hands and rounded up the watch in less than five minutes. I don't think Flynn was in any hurry to find it. However, he cheered up immediately and to show his appreciation, the two of them proceeded to have their own little party right there in front of everybody.

Gold Star Janitor

Chuck Auerbach put the finishing touch on it the next day when he paid a couple of kids an ice cream cone apiece to clean up the mess. The kids did a wonderful job, and we think Chuck deserves the united thanks of Troop for his fine example of interhouse fraternity. We could go on for pages listing many interesting items, although I doubt most of them would pass the censor. Anyhow, I'll start to close this with a few resolutions and observations.

Scripps, Please Note

I have heard from my friends that waste their time at Scripps that the fair maids are rather unhappy with this column. The only thing that I could suggest to correct this would make them

only that much more frustrated. While on Scripps, I have just finished reading Misses Mewhirter and Weaver's gush column in which they pat each Scripps maid on the back at least once a year (twice if they can). Then they complain that I do not sign my name to the Brewin's, which prides itself on never having said anything nice about anybody. However, to prove to the everdoubting female that I am big and brave, this copy will be signed.

I am never going to complain about the food Mrs. Bunton serves us, and resolve to spend at least one night a week mooching Haig & Haig from one of my friends.

The last item is that Yours Truly and the whole Tech staff wish you the best for the com-

hindrance. As heavy as the work is here in comparison to other schools, it isn't near the breaking point.

Sometimes an additional spur is just the right thing to encourage that latent efficiency . . .

Besides, if we get enough men down here, the load becomes light for everybody. That's what we're striving for. It's never happened at Tech, but it could.

ing year and more interesting and eyecatching items in this column.

ETAOIN SHRDLU.

ED. NOTE: Don't think this Shrdu is the same one we know, but then if you wrote this column would you use your real name?

TALKIN' IT OVER

(Continued from Page 3)

around the eye. This last scare puts Jay ahead of Dennis Long in the race to see who gets cut up the most. Next time Monty gets scratched he's going to have the doc cross-stitch "Home Sweet Home" across his forehead. Cox had some bore come up and stick a finger in his eye too, but Bill got away with a few cold compresses. The last game we had with them, Red took along a pair of brass knuckles just to make sure he wasn't pushed around.

Hard Weed-end

Ought to be a couple of good games this week-end. Oxy on their floor is a tough combination to beat. The Tigers know just how to block you into one of the stone pillars that decorate

warfare agent which wages war on other plants trying to encroach its domain. It also shows that while the sociology of animals is psychological, that of plants is chemical," Bonner said.

the floor, while smiling so sweetly at the ref. Even with the loss of their star forward, the Bengal five is still one of the strongest in the league, while the lily-white amateurs out Pepperdine way have again scored the Midwest for eight or ten melon men who "like the atmosphere out here." The Wave quintet looked very powerful at the Invitational Tournament a few days ago but I think that the old Beavers might gnaw a win from them. See you at the games.
