Leakey Receives **Standing Ovation** at Beckman

by Peter Beckman

World famous anthropologist Louis S.B. Leakey received a standing ovation from a packed house as he walked on stage at Beckman Auditorium Friday night. Although his health has suffered over the past year, Dr. Leakey looked hale and hardy as he narrated a film entitle "Exploring the Land of the Sonjo.'

The film covered a 1964 expedition of Leakey's to the area west of Lake Natron on the Kenyan-Tanzanian border. The expedition overcame many obstacles poised by the rugged area and was able to uncover an important site occupied by early man. They also found including the complete skull of a

Much of the film was given over to the life of the Sonjo people who now occupy the area. Although the tribe is primitive in western eyes they are well adapted to their environment. They raise sheep and goats and farm part of the year when the Panini River is full. With this water they irrigate their fields using a combination of communal and personal labor to build and clear their irrigation canals.

To protect themselves against mosquitos the Sonjo build their huts on stilts reaching above the air layer occupied by the insects.

U.S. Senator Alan Cranston reveals that expiration of the draft law does not mean an end to the draft to an Athenaeum luncheon audience on Monday.

<u>Interview</u>

several fossils of extinct animals including the complete skull of a Kousser Answers His Critics

by Phil Neches

"I neither apologize for what I did nor feel sorry for it, although it detracted from much more important points," said J. Morgan Kousser of his refusal to shake hands with Gen. Daniel James after last Monday's interview-discussion on the Olive-Walk, Kousser made his statement to California Tech reporters last Friday.

He stated that his reactions should not reflect adversely on Caltech, as some have indicated. "I certainly did not mean it as such," he said.

"I shook hands with him (James) before the debate," Kousser continued. By his name-calling, "he broke the rules of civility." As someone who teaches Black history and whose research specialty is the black and the poor white in the South, Kousser said that he resented the charge of racism implied.

Kousser said that James backed down repeatedly on his point that many Americans were part on a "Hanoi lobby" when challenged by Drs. Vogt and McMahon. That should have been the point picked up by the press, according to Kousser, "not anything I did."

Provocation

"I was a bit shocked that someone as professional as he (General James) . . . would refuse to deal with Dan McMahon's arguments over CBW; that he would bludgeon his way through the debate by dastardly name calling.

Cranston Speaks Out On VietNam, NATO, Lockheed

by John Tristano

California's senior senator, Alan Cranston, spoke last Monday at the Athenaeum for the Y luncheon. The senator spoke on a diverse set of topics which included the draft, the Environment, the military, NATO, and Lockheed.

The Draft

The senator favors the immediate creation of an all-volunteer army with improved pay, living conditions, and educational advancement according to reports of the Gates Commission. He feels that the draft is unfair because it discriminates against certain Americans due to their age, education (or lack thereof) and their social and economic backgrounds.

He feels that the draft imposes harsh choices on youth whose consciences tell them to oppose the Vietname war but who can not technically qualify as CO's. He is committed, if the proposal for an all-volunteer army fails, to join with the Sen. Mike Gravel and three other senators to filibuster against the draft. This filibuster, if necessary, will be unique in that it, unlike the majority of filibusters. will be aimed at ending minority oppression of the majority, who

have demanded in poll after poll that we get out of the war faster than we are now doing.

2S's Can Still be Drafted

The senator also pointed out that, under current law, even if the draft is killed by the senate, over 5 million men can still be drafted. These men are people who are presently deferred including education, hardship and agricultural deferments. This loophole is in Section 17(c) and reads no one can be inducted after July 1, 1971, except those now or hereafter deferred under section 6 of this title after the basis for such deferment ceases to exist. This exception allows the continuation of the draft for up to 17 more years.

Military

Senator Cranston stated that he will co-sponsor a bill to place a \$68 billion ceiling on military spending next year. The current military budget is \$76 billion. He feels that this move will strike a major blow at inflation while at the same time reducing the danger of an escalating arms race.

NATO

The senator favored cutting our troop size in Europe. He does not think that our maintaining 300,000 troops will prove to our European allies that we will come to their aid in the event of a Russian invasion. Why must we sacrifice these men simply to maintain a human tripwire in Europe or to show the Europeans that since we are willing to lose these men quickly we will somehow be obliged to send more men to make somehow the loss of the first 300,000 worthwhile, much the same way as we want a military victory in Vietnam so that 55,000 deaths will be explainable.

The presence of so many NATO troops and Warsaw Pact troops in this region increases the possibility of a small incident being expanded into a major confrontation. Furthermore, under simulated conditions it was found that commanders tend to overploy their weapontry. The NATO troops are armed with tactical nuclear weaponry and it is reasonable to assume that Warsaw Pact troops are also.

Not Again?!?

Class, ASCIT Offices Up for Grabs

by Steven Watkins

There will be a general election next Wednesday, June 2, for ASCIT social chairman, and athletic manager, class offices, and an issue relating to support of a public interest research group.

Nominations for class offices [as of Tuesday]:

Sophomore Class

President - Greg Stone, Dave Larwood

Vice President - Greg Simay, Kim

Border, Gerry Hanggi Secretary - Bob Murphree

President - Bob Bechtel Vice President-Gary Pope Secretary—Andrew Weigel Treasurer-Bill Derrick, Carl Imparato

Senior Class

President-D.J. Smith, Peter Chan Vice President-Mike Shull, Randy Lewis

Secretary-R.W. Siegfried Treasurer—Alan Bross

ASCIT Offices (as of Tuesday) Social Chairman-Bob Spencer Athletic Manager- the team of Bruce Johnson and Rick Smoody

The public interest research group issue concerns adding a dollar per term on some people's term bills. The passage of the issue would permit each student to decide each term whether or not he wishes to contribute to this group. This would not be an automatic, blanket, term bill increase nor would this be an increase in ASCIT dues. For infor-

Kousser Answers His Critics

To the Editor

On Tuesday, May 18, I participated, along with two other Caltech faculty members, in an interview with Brig. General Daniel C. James, at the end of which I refused to shake the General's hand.

On Wednesday, the Star-News ran a story on the discussion which implied that I acted as I did because I was a racist. I am not.

In fact, I have the greatest admiration for General James' achievement in overcoming the racial biases which pervade our society to become the highest ranking black man in the Air Force.

What I resented was not the color of the General's skin, which I and the rest of the audience completely forgot while he mouthed the same Pentagon propaganda line which has made the Indochina War the longest in United States history, but the fact that he employed that old unscrupulous debater's trick-when you can't answer someone's argument, attach his patriotism.

During the discussion, he stated that among the American citizens who oppose his hawkish views on the Indochina War are, to quote

him, "representatives of Hanoi" or members of the "Hanoi lobby". I believe his name-calling was an attempt to smear the peace movement in general and his interviewers, including myself-as I remember it, he looked in my direction as he said "representatives of Hanoi"-in parti-

That a high-ranking government official would seek to pin the tag of disloyalty on patriotic Americans who disagree with him is a serious matter. I could not bring myself to shake hands with a man who would engage in such disreputable tactics.

Seventy-three percent of the American public favors a complete United States withdrawal from Vietnam by January 1, 1972. But Pentagon spokesmen are so isolated from the people, so indoctrinated by their own propaganda, that they equate dissent from their policies with disloyalty to the country. It is these military men, not the unsilent majority of the people who desire to put an end to the killing, who are the real threats to American

> Sincerely yours, J. Morgan Kousser

Throop Beat

Throop Beat Needs a New Building

by millikan troll

Techers may now take advantage of Occidental's foreigh exchange program, according to the Genial Dean. The plan takes advantage of existing programs, thus avoiding the expense of setting up the necessary administration here.

Students who take advantage of this program will pay tuition to Oxy during their year abroad, not to Caltech. Readmission to Caltech after the year would be automatic. Students on the program can take years abroad in Germany, France, Japan, and Africa. See Dr. Huttenback for more details.

Oversights

The schedule of classes for first termnext year omits several economics classes. Econ 100, to be taught by Mr. Morrisroe [Director of Financial Affairs for the Institute], will be offered. I believe this course has been described in an earlier column.

Econ 106 [Gray] will also exist. See the write-up in the catalog. Also, Econ 130a,b will be added to the roster of courses. The course is titled "Political Foundations of Economic Policy," and will be taught by Dr. Plott, newly-appointed to the Division of Humanities.

Talk It Over

All of the R.A.'s and house presidents, the Institute psychologists, Dr. Smith, and Dr. Bonner met yesterday to discuss plans for housing women students next year. Apparently, a roughly equal number of women will live in each of the student houses, with perhaps more in the houses which already have women. This will mean about six or

Personally, I think that this will offer distinct advantages, both to houses, and to the women. The period of transition between now and the time two years hence when there will be substantial numbers of women in each of the four classes will be eased by not forcing any one or two houses to accept a lopsided freshman class. The incoming women will have a greater diversity in life styles amongst which to choose, and hopefully will face less pressure. Time will tell.

Price Paid

According to Dr. Dave Smith, having a June 1 deadline to get in \$50 room deposits for next year is "the price upperclassmen have to pay for having first shot" at space in the student houses. . . . The Don Shepard Awards will be announced soon. ... Watch for a new Huttenbook soon.

Plots are now afoot to move freshman orientation off-campus this coming September. Camp Fox on Catalina Island seems the likely spot for acclimating the Class of '75, according to rumors repeated here. Other rumors have it that the main lodge at good old Camp Radford burned down, thus removing the San Bernardino mountains from the competition.

Rennovate Madly

The proposed summer rehabilitation of the old houses this year plans to do something for everyone rather than everything for some. The plans call for upgrading lighting and plumbing fixtures in all old houses rooms.

The new electrical fixtures consist of new main room lighting, flourescent lights over washbasins. and the strip-type outlets now featured in the girls' wing of Blacker-Dabney. Plumbing reforms include mixing faucets. Also, a new transformer and distribution system is called for.

Not All the Way

However, rennovation of some of the more superficial items will be left for another summer. New furniture and bookshelves will have to wait.

Despite a lack of funds, the Institute building program is creeping forward. Culbertson auditorium will be leveled sometime in December to make room for the new Geological Sciences building [which the administration has taken to calling "Shoemaker's building."]. Working drawings are now being made for that endeavour, which is jointly fi need by Mudd money and a federal grant. Groundbreaking will hopefully occur sometime next spring, say in March or April.

Number two on the list appears to be the BeHavioral Biology lab, which is presently only about half funded. The building will replace Michigan Avenue, thus Pasadena has started preliminary drawings for relocating the utilities beneath Michigan, and should be ready for the next step next month. [The city has agreed in principle to having all streets interior to campus closed, but realization of this is a long way

Engineering Club Activities Successful

by Sam Insana

This year the Caltech Engineering Club put together its most successful program in a long time. First term saw a field trip to the computer graphics facility at C.F. Braun, a luncheon at the Athenaeum to discuss the American Society of Mechanical Engineers, a Pizza Party at Shakeys, and a trip for two to the ASME Winter Annual Convention in New York City.

A two day trip to San Francisco to see BART started off second term. A guest speaker from the Los 'Angeles traffic planning department had to face many dissatisfied freeway drivers at one meeting. Another meeting involved the three Caltech students who took part in he McDonald Douglas Space Environmental Chamber Test. Bridge construction films (with only casual references to theoretical physics) were shown at another meeting. Finally a trip to the local San Antonio Winery helped us in our thirst for knowledge of fermentation processes.

Third term started off with a follow-up study of the student-faculty engineering conference held at Tech two years ago. Members of the ASME interviewed faculty on problems in Engineering and a report was completed and submitted to the division chairman. Then a

Public Interest Legal Group

Students Go Ahead Without Grant

by Ralph Graham

In February an article appeared in the *Tech* describing a Ralph Nader type group that was forming in Los Angeles. That group's application for funding by the Ford Foundation was denied, but students in the L.A. area still have the opportunity to support a public-interest legal group. These legal groups undertake action to equalize the difference between the organized companies and the unorganized public.

Colleges from every part of the L.A. area are now cooperating at Cal State Fullerton in forming a student-managed organization that will eventually, they hope, include the entire state of California. The group intends to oversee a full-time professional staff that will be paid by the student group. The student organization hopes to get its money through one-dollar per term contributions from each student at participating colleges. The request for the dollar will appear on the term bill of each student, but it need not be paid.

The role of students in the organization will be to make policy, to provide financial support, and to prove whatever staff support they can. The latter will include publicity, office work, and, for Caltech at least, research. It also seems likely that the EQL and the legal group will develop a close relation-

Although Caltech will not provide a significant amount of financial support because of its small enrollment, it is proposed, by ASCIT, that a charge of one-dollar per term be plaed on the term bill of every student. No student would have to pay this charge. All money collected will be held by ASCIT to be given to the Cal State Fullerton group. This matter will appear on an election ballot later in the term.

For further information, see Steve Watkins or Ralph Graham.

Throop Beat

Continued from Page Two

Well, the Rivet will descend on your tortured mentalities next week, so the time has come to sign off. This is my last column this year [stop snickering out there]. I've tried to keep you informed; I hope I've succeeded. Remember that only you can defeat militant apathy. DO SOMETHING. At least, I've tried.

Have a good summer, and see most of you back in September. For those going out into the cold, cruel world, I wish you the best of luck.

Cranston

Continued from Page One

Environment

The senator asked the federal Environment Protection Agency to reconsider the California request that all and not just 25% of the new cars to be sold in California beginning with the 72 models have their smog control devices checked.

Winning Debate Team Seeking **New Members**

Charles Johnson

As one of those few Caltech teams to post a winning record (63-51 in 1970-71) in intercollegiate competition, the debating team is looking forward to next season. Aided by a good deal of recent interest the squad will probably number ten or more next season.

Anyone interested in taking part in the program is welcome and should contact the nex Director of Forensics Charles Johnson in 266 Sloan (ext. 1343) or Fleming House. Likely stops on nextyear's tour include Northwestern, Air Force, Houston, Dartmouth and Emporia in addition to the major tournaments in California.

Next year's topic will be announced August first. Returning debaters Bryan Jack, Bruce Seaman and Dick Trtek will lead the squad which includes a varied list of backgrounds. New debaters next year will include Dale Collins, James Hugg, Steve Margaretic, Greg Nelson, and Paul Steinhardt. Only an interest is required and the activity is opened to those with or without experience.
